

Project Name : Touch Sensor

Course Title : Mobile and wireless Communication System Sessional
Course Code : CSE 416
Department : Computer Science and Engineering
Level : 4
Semester : I

Team members :

1.Mirza Md. Saikh Seraj	ID No: 1902054
2.Afsana Parvin	ID No: 1902037
3.Shathi Akter	ID No: 1902027
4.Tithy Roy	ID No: 1902030
5.Md. Ariful Islam	ID No: 1902019

Project Description:

A touch sensor is an electronic sensor used in detecting and recording physical touch. When we will touch by our fingers then the LED will light and buzzer will make sound according to touch. It is used mainly kids toys, lamp dimmer, sensors, fax, telephones. It is also used at home and in bank for security.

Components:

1. NE 555N timer IC
2. 330 ohm resistor
3. LED
4. 9 volt battery
5. Jumper wires
6. Bread board
7. Buzzer
